because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

I. Claims 1-19, 21-22 relate to a high frequency package provided with a first signal via arranged on an inner side of an electromagnetic shield member, a second signal via arranged on an outer side of the electromagnetic shield member and an inner layer signal line connecting the first signal via and the second signal via.

II. Claims 20-22 relate to a high frequency package provided with an inner layer signal line connecting a plurality of signal vias.

These two groups of inventions are not considered as a group of inventions linked to form a single general inventive concept.
